

ANUBHAV KIROULA

Software Developer | AI/ML Engineer | Full Stack Developer
Haldwani, Uttarakhand | anubhavkiroula1@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

First-year B.Tech CSE (AI & ML) student at Graphic Era Hill University with a 9.33 CGPA. Builds production-grade systems with Node.js, FastAPI, React, Docker, and CI/CD pipelines. National-level hackathon finalist (top 800 of 52,000+ developers). Seeking a software engineering or ML internship — remote or Delhi/NCR on-site.

EDUCATION

Graphic Era Hill University, Dehradun Aug 2025 – Jul 2029
B.Tech — Computer Science & Engineering (AI & ML Specialization) **CGPA: 9.33 / 10**

Universal Convent Senior Sec. School 2025 / 2022
Intermediate (XII) / Matriculation (X) **91% / 92.8%**

PROJECTS

Smart Library Management System | Node.js · TypeScript · Flutter · PostgreSQL · Docker Feb 2026

- Automated QR-based library occupancy tracking system; reduced seat search time by 85% and improved space utilization by 25% for 2,000+ users.
- RESTful API with 100% entry/exit accuracy and <500ms response times; transactional DB operations with duplicate protection and comprehensive Jest test coverage.
- Flutter mobile app with real-time availability + web admin dashboard; containerized with Docker and deployed on Supabase cloud.

Intelligent Data Cleaning Platform | Python · FastAPI · React · TypeScript · HuggingFace · Docker · CI/CD Apr 2026

- RL-powered data cleaning platform with 95%+ accuracy and 80% reduction in manual cleaning time; async Celery workers handle CSV uploads up to 100MB.
- React/TypeScript frontend with drag-and-drop upload and real-time monitoring; HuggingFace Llama-2 integration for NLP-based missing value imputation.
- Full CI/CD pipeline via GitHub Actions: Docker builds, pytest + TypeScript testing, linting, and deployment verification — 100% build success rate.

Stock Price Prediction System | Python · Scikit-learn · NumPy · Pandas · Financial APIs Nov 2024

- ML-powered financial tool with regression/classification models for market trend forecasting; live API integration for real-time stock price ingestion and investment insights.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, HTML, CSS

Frameworks: React.js, Node.js, Express.js, FastAPI, Flutter

DevOps & Tools: Docker, Git/GitHub, CI/CD (GitHub Actions), Linux, VS Code

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Supabase

ML & Data: NumPy, Pandas, Scikit-learn, Matplotlib, HuggingFace, Reinforcement Learning

Concepts: REST APIs, Data Structures & Algorithms, OOP, Computer Networks, Operating Systems

ACHIEVEMENTS

- Meta × PyTorch National Hackathon Finalist** — Top 800 of 52,000+ developers nationally; PyTorch-based solution for efficient model deployment.
- CGPA 9.33/10** — Consistently among top performers in B.Tech cohort at Graphic Era Hill University.
- LLM Engineering & Prompt Engineering Specialization** (Udemy) — large language models, prompt optimization, and AI application development.
